Case Studies  
Low Carbon Innovation

After reviewing their early results clients such as: The Rank Group, DEFRA, Fitness First, Road Chef, Regents Inn, Local Authorities and leading UK High Street Banks are now all reaping the benefits of powerPerfecting more and more of their buildings. We are also pleased to announce that the Institute of Mechanical Engineers have recognised the value of the powerPerfactor and are installing a 210kVA at Bird Cage Walk.

### 12 Units for London Borough of Barking and Dagenham

12

units in 10 sites to include the Town Hall, Civic Centre, Leisure Centres, Car Parks and LBBDD Offices will be installed over the next few weeks to assist LBBDD as part of their Carbon Management Programme.

The predicted savings look excellent and we will be reporting on the results of the case studies as soon as they become available.

#### **Alina Lazar LBBDD Environmental and Sustainability Officer**

*'powerPerfactor is a key component of our Carbon Management Programme and an excellent way of saving carbon emissions. Working with the powerPerfactor team over the last few months has been a smooth and painless process. We're looking forward to the installations across our buildings and the carbon savings that will be achieved.'*

## pP PROUDLY PRESENTS 'THE RANK GROUP'

Performing in a Cinema, Casino, Cafe, or Bingo Hall near you will soon be a powerPerfector. The Rank Group take energy efficiency very seriously and are using pP to assist them in their management programme.

The installations are well underway and units are being installed in sites throughout the UK.

## MORE GREAT RESULTS FROM DEFRA

An 830kVA powerPerfector unit with a 9% optimisation setting was installed at Kings House on 5th May 2007. Since the unit was installed an analysis of the half-hourly kWh consumption data, recorded by the site's HV meter, on the 60% of the load that is optimised by pP shows savings of approximately 17%.

21st April was the installation date of a pP560kVA for DEFRA'S B.C.M.S. Curwen Rd site, savings look great and will be reported upon as soon as the full results are available.

## POWERPERFECTING THIS MONTH ARE.....

We have received PO's or installed units this month for the following clients:

Orange, Experian, Gilberts Blackpool, Kaysersberg Plastics, Dynamic Electrical Services, Hilton Adnams Bromsgrove, Frupak, Open University, DEFRA, The Veterinary Laboratories Agency, The Rank Group, Regent Inns, Road Chef, Fitness First, and in the Public Sector this month : Wigan Council, Nottingham C. C, Stroud D.C., Ryedale D.C, Brentwood B.C. Bristol C.C. Worcester C.C. and Milton Keynes.

**powerPerfected Plaques to follow.**

## KAYSERSBERG PLASTICS INCREASE INVESTMENT

Two more units, a 420kVA and a 560kVA, have been installed at their Gloucester Site increasing the pP units to three. Despite the appalling floods suffered in the surrounding areas delivery and installation went to schedule. Reports to follow later in the year.

## DIARY DATES FOR AUGUST AND SEPTEMBER

The Environment Centre have asked us to take part in a Member's Meeting to be held at 'Vesta's' on the Isle of Wight 17th August, pP will be discussing the importance of 'Cutting Electrical Waste at Source' the event

will be covering Environmental Law, Waste Management and the benefits of Ground Source Heat.

<b>Our next exhibition attendance will be at 'The Energy Event', at the National Motorcycle Museum on 12-13 September.

## pP TECHNOLOGY HAS SAVED 52 MILLION kWh TO DATE

**There are now over 21 Million kilograms less CO2 emissions out there and accumulated savings of over £3.75 Million by businesses throughout the UK since pP was introduced.**

**.....IT PAYS TO POWERPERFECT.....**

## LOW CARBON INNOVATION FORUM

powerPerfactor took part in the staggeringly productive 'Low Carbon Innovation Exchange' held at Olympia on June 14th, well done to John Webster and his team who co-ordinate the speed 'one to one' meetings and round table discussion groups with military precision.

I would urge anyone tasked with the responsibility of resolving their Carbon Emissions/Energy Consumption/Costs issues to seriously consider joining the LCI forum to share best practice and to find out who's doing what, and how.

Investment in future technology and adopting it, as and when it becomes available is prudent, whilst using proven energy efficiency technology now is absolutely essential.

We would like to introduce seven new members of staff who join us this month: in the Public Sector Aaron Collins, in the Private Sector; Kieran Sands and Nicholas Keegan, in Engineering Kevin Richardson and Matthew Whitehead. Our new office assistant's Emma Barnard and Rebecca Gold will ensure you always get an animated, helpful person on the end of the phone not an automated list of options.....

**PLEASE UPDATE YOUR RECORDS..our new address from today Monday 13th August is 1-10 Praed Mews, London W2 1QY. Telephone remains the same: 0845 601 4723**
