

Delivering on your Carbon Reduction Commitment

Dear Dave and Nick,

You "Young Guns" have a chance to make history - to put the country before politics - be tough on fiscal policy, make the cuts we need to prevent us becoming "Little Britain" - an horrendous thought - 3 years tough love for 30 years prosperity - I say - we are British and we can take the medicine. Also give us a carbon tax that recycles into a full energy efficiency rollout program to massively reduce CO2 output. Legislate for the masses - the silent majority - if you do you will have the respect and support of the huge majority. Time we don't have, yet time will be your judge.

AMNESTY INTERNATIONAL AND GREENPEACE BEING POWERPERFECTED

Amnesty International and Greenpeace join WWF, RSPB and other third sector clients, by installing two powerPerfector Plus units at their head offices. The Third Sector has been hit exceptionally hard by the recession as a result of many individuals and companies opting to reduce or stop their donations. Any savings to their cost bases are appreciated by the recipients of their much needed support for the oppressed and helpless in our environment. So while annual savings may look small at £4,410 and £1,286 respectively over the 40 plus year life of the product they are well over £200,000 - and that's at today's prices. "Tuning" your supply with the pP+ improves site security and the life span of equipment and just so you know The Carbon Trust opens the gateway to Third Sector organisations to install our technology with 4 year interest free loans and we will guarantee your savings will be above your loan repayments - so why wouldn't you ?

Retty Eliades from Greenpeace said;

'Greenpeace has always said that saving energy is good for the environment and just as good for the wallet, and we're always looking for chances to put that into practice. The powerPerfector system will save us money and reduce our carbon footprint at a time when we're looking to spend our supporters' cash as carefully as ever'.

Good Energy CEO Juliet Davenport said:

"As a Good Energy customer Greenpeace already knows how important it is to use 100% renewable electricity. We're delighted that they've taken further measures to reduce their energy usage - the less energy we all use in the UK, the greater the proportion we can meet with renewables."

Further Third Sector Installs;

Doncaster College for the Deaf had a unit installed in April which will save it 68,000 kWhs annually.

PROVIDING VALUABLE SAVINGS TO THE NHS

powerPerfactor is helping to alleviate some of the fiscal, legislative, and environmental pressures faced by energy and financial management teams in public healthcare organisations.

Numerous government agencies and NHS hospitals in both acute and non-acute sites continue to "rack up" savings" - a recent tender win (confirmed in January this year) will add Princess Alexandra Hospital in Harlow, Essex, to the list with their large pP+1500KVA that is estimated to reduce consumption by 9%. The pP+ responds intelligently to the incoming supply voltage to bring it to its optimum and adds to already impressive sustainable energy measures implemented by the Trust, which include solar panels and more efficient boiler installations. The new pP+ is anticipated to annually save;

Over 3,000,000 kWhs of electricity, £45,000 per year and associated upstream emissions of: 180 tonnes of CO₂, 380 kgs of NO_x and 11 kgs of PM₁₀.

All very positive news for our hard pressed NHS service and our lungs !.

ENERGY CHAMPION AT CALEDONIAN BREWERY

"Energy use makes up a large part of our business, with production equipment running 24/7. We take our environmental responsibilities seriously, and want to ensure that we are not wasting scarce resources.

Our research into energy efficiency technologies always had powerPerfactor's Voltage Power Optimisation as unmatched. Partnering with the "best in class" is important to us. Production equipment is central to our business and therefore the reliability and track record of a new technology installation is non-negotiable. powerPerfactor's savings, guarantee, prestigious client portfolio and 100% reliability and installation record is unrivalled.

Since the installation, we have seen over 10% savings in our consumption, cost and carbon footprint which has been great for our business. In addition, the windfall gains from improved power quality benefits, such as the prolonged life span of our equipment and increased security of our energy supply, would not have been achieved with other technologies."

Craig Yardley, Engineering Manager, Caledonian.

Savings Summary for Caledonian Brewery:

·	Reduction in average kWh consumption:	11%
·	Projected annual CO ₂ emission savings:	105,800kg
·	Projected annual financial savings:	£11,400

CONTINUED GREAT SAVINGS IN WALES

Treorchy Comprehensive School serves the Upper Rhondda district and is an 11-18 mixed comprehensive school situated near the town centre. The school occupies 13 separate buildings on a long narrow site. A pP350kVA was installed on 5th December 2009 and is saving:

16.1% in kWh consumption
51,302kg - CO2 emissions savings annually
£12,137 annually
The full case study is available on the website.

Our presence in Wales continues to grow, and has produced some fantastic Welsh case studies. The work at the Welsh Assembly Government and superb relationships with our Consultancy groups who are all sharing best practice, knowledge and great energy efficiency initiatives are benefiting local businesses and communities.

One Welshman who has been "on song" for several years integrating our technology into his highly developed individual site energy efficiency "make over" is David Jones of The David Jones Partnership, M & E Specialist Consultant and Chartered Electrical engineer. David spoke at the Cardiff Millennium Stadium Masterclass - presenting case studies from the Regent Inns Group and the Dragon Hotel. He takes a "custom designed" approach to each building and with other demand optimisation technologies and a common sense approach generates 30% savings for clients all over the country. Rank Organisation, a company fully committed to greening its estate, is making savings of £100,000 per annum from his recipe of solutions. email: admin@jonespartnershipswansea.co.uk

SUSTAINABILITYLIVE AND SB 'THE EVENT' CONFERENCE

Brilliant show, and great to see so many old and new clients.

CEO Angus Robertson chaired the SB Conference for the 'Energy Efficiency in Action' session which provided lively debate and a great source of shared initiatives.

Two of the three organisations represented on the main plenary where; Andrew Forte -Director of Property and Utilities for The Hilton Group, and Julian Feasby - Head of Internal Environmental Management at the Environment Agency - both already have, and continue to rollout, powerPerfectors to their estates. They both shared their broad knowledge of other initiatives they had implemented and there was much "scribbling" in the audience. I wonder how much carbon they will have saved just by telling others what to do ? Alex Pitman - Group Energy Efficiency Manager, The Co-op Group, also on the panel, then high-lighted plans for future improvements in energy efficiency in his huge estate, providing the delegates with more valuable insight from both the Private and Public sectors. The fact is Property directors, Sustainability officers, energy and facilities managers can make more money for their organisations by cutting waste and costs than 95% of employees - so we better start listening to them.

FORTHCOMING EVENTS

We are exhibiting and sponsoring the ESTA events around the UK this month, these are free to attend with a great line up of presentations and workshops. We will also be exhibiting at the Central Buying Consortia event in London at the Institute of Engineers on 20th, presenting and exhibiting in Manchester at Greenbuild Expo, Manchester Central on the 26th 27th, also free to attend - so log on to the link below, register and hopefully we will see you there. www.greenbuildexpo.co.uk

FOOTPRINT FRIENDS IN THE FOREST

Footprint Friends were delighted to be invited to attend a Greener Living exhibition in the New Forest. The volunteer team, which are principally powerPerfector employees, went hot foot to Hampshire to set up a foot painting activity to encourage climate change communication for children. Our team have great fun at these events and it's lovely to have an opportunity to engage with 'little' customers too! The output can be found at:

<http://yoursay.footprintfriends.com/media/tags/2010/default.aspx>

Coming soon.... Can we count on you to be part of a WOW generation?

THE GREAT MANCHESTER CITY RUN

The powerPerfector 'Dreams Team' put in a very impressive performance during Saturday's 10K race raising a whopping £5,390 for their chosen charities. A big Congratulations to Nick Phillips who completed the run in 41.20 - averaging under 7 minute miles! Superb! No doubt the fact that Tanya Robertson-Lambert was hot on his heels (and the chance of losing a rather hefty wager) motivated Nick to keep the pace up.

Congratulations to everyone who took part.
